

# FOREIGN NUMBERS

## GLOBAL COOPERATION WITHIN THE COMPANY

The Foreign Numbers service enables employees throughout the world to work together in a common telephony solution, fully integrated with local mobile and fixed telephone numbers.

### CALL FREE TO ALL EMPLOYEES THROUGHOUT THE WORLD

The service gives all your foreign colleagues access to the same switchboard functions, mobile switchboard, softphone and IP telephone that you have in Sweden. People working abroad can retain their local mobile- and fixed number and it is always possible to see availability regardless of where in the world you are located. Besides the referral system, you can choose functions such as chat and group chat, free SMS to all colleagues' mobiles and free internal calls.

### COLLABORATE SEAMLESSLY OVER BORDERS

This function means that you never need to miss a call again – in any country. It is possible to create call groups where users in all countries help to answer calls. You can also choose to have a central telephonist who receives all calls and connects them onward, with absolutely no delay and expensive onward connections.

### SUBSCRIBE TO NEW FOREIGN TELEPHONE NUMBERS OR TRANSFER EXISTING ONES

Have the country's local operator connect your employees to Dstny and we will ensure that they receive the same freedom of choice as the Swedish employees and make them fully integrated in the solution. They

retain their fixed and mobile numbers and obtain access to the telephony solution's services. We are happy to help in securing new numbers abroad if you don't already own any foreign numbers. Remember that so-called MEX subscriptions are not available outside Sweden.

### BENEFITS OF THE SERVICE

- Easy to get started
- No burdensome hardware investments
- The same function regardless of country
- Free calls within the system
- Reduces the distance between you and your employees throughout the world
- Good performance and high level of reliability
